

Protect our Planet Group – July 2008

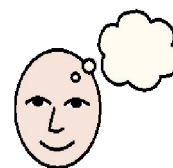

22 of us meet on the 15th July 2008 at the Consortium office and we talked about the planet and what we could do to help it.

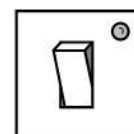

We are going to all come up with a name for the group and send in our ideas to Julie or Rosanna and then the group will choose the name at the next meeting.

We thought of lots of ways to help the environment!

We can make sure electrical equipment is turned off if we are not using it.

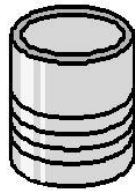

Walk or cycle instead of drive especially on a nice day.

When we go shopping we can take our own bags so we don't have to use plastic bags.

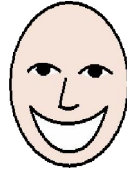

We will recycle our tins, glass, paper and plastics – some of us do this already.

We will make sure that our light bulbs are energy saving ones.

We all really enjoyed this meeting and decided that we are going to meet every 2 months.

The next meeting is in September, so if any one else wants to come then let Julie or Rosanna know at the Consortium office.
