

At the Save Our Planet Group on the 5th May we started with everyone telling stories about what we had done on the weekend. Sarah from Skewen had enjoyed an American themed birthday party at her home. The rest of us had enjoyed the nice weather and some of us had Barbeques and got together with friends.

Rosanna talked about making videos to support her values training and asked the group if there were any volunteers to do some acting! Some of the group were interested and they did a quick video session to practice with Rosanna and Karin talking about green issues.

Julie talked about designing a certificate which will be given out at this year's Annual General Meeting. It will be for staff and service users that have been with Community Lives Consortium for over 15 years. We are going to arrange another meeting to discuss this in more detail.

Karin did some recycling quizzes with the group. One quiz had the group looking through a bag of rubbish and guessing which item took the longest to rot! The other quiz was questions about recycling and the environment.
